

Klinische Studie Novartis H5N1+MF59 in Polen an 350 Probanden – 21 gestorben!

28.08.2009 von Administrator

[Leave a reply »](#)

21 von 350 teilnehmenden Obdachlosen während der Studie gestorben, da sollte man genauer hinsehen. Haben es unsere Medien genauer hingesehen und darüber berichtet? Wer hat über die Studienfolgen in Polen berichtet? Weiß einer der Probanden in Deutschland bei der Aktuellen Studie mit AS03 von diesen Vorfällen? Auch etwas zu den unten genannten Rattenversuchen?

Scheinbar sind von GlaxoSmithKline vor Menschenversuche lediglich der Kurzzeitversuche mit den 30 Frettchen publik. Diese von GSK bezahlte Studie untersucht lediglich wie stark AS03 die Wirkung der Antigens verstärkt.

Risikountersuchung? Fehlanzeige!

Der Immunverstärker MF59 von Novartis ist übrigens auch interessant: (squalene 9.75 mg, polysorbate 80 1.175 mg, sorbitan trioleate 1.175mg)

Novartis, another big pharma, announced on 13 June that it, too, has produced a swine flu vaccine using cell-based technology and the proprietary adjuvant MF59®. The MF59® adjuvant is oil based and contains Tween80, Span85, and squalene [25]. In studies of oil-based adjuvants in rats, the animals were rendered crippled and paralyzed. Squalene brought on severe arthritis symptoms in rats, and studies in humans given from 10 to 20 ppb (parts per billion) of squalene showed severe immune system impact and development of autoimmune disorders [26].

Novartis was in the news in 2008 for a clinical trial of a H5N1 vaccine in Poland. The trial was administered by local nurses and doctors who gave the vaccine to 350 homeless people, leaving 21 died; and were prosecuted by the Polish police [27, 28]. Novartis claimed the deaths were unrelated to the

H5N1 vaccine [29], which had been "tested on 3500 other people without any deaths."

Gewissenhafte Prüfung von neuen Wirkstoffen sähe in vielen Punkten anders aus! Diese Immunverstärker sollten dieses Jahr nicht mehr zugelassen werden!

Gruss
